EXPERIENCE

Flipboard

Jul 2014 – Sept 2014

Engineering Intern

Worked as a Software Developer Intern on the Platforms Team. Used several external and internal frameworks to build an internal analytics dashboard. Worked on an internal interface to increase productivity of customer-support team. An interface for dealing with customer issues and flagged items coupled with a robust analytics system with notifications and warnings.

Softech

Jun 2013 – Aug 2013

Web Dev Intern

Worked as a Software Engineering Intern on Web Development Team. Worked on Front-End for Company web presence. Used technologies include jQuery, Bootstrap, and Backbone.js to create a seamless beautiful responsive webpage.

dshaik.com

Jan 2012 – May 2013

Freelance Developer

Met with clients to define aesthetic and functional specifications. Analyzed client's business objectives and directions for the web in terms of product positioning, branding, target audience or markets and web traffic generation. Worked with a variety of businesses in order to create a web presence for their brand.

PROJECTS

Brim

An iOS mobile application, which utilizes Bluetooth Low Energy in order to notify you when you are on the brink of losing your friends. Brim sends a push notification when your friends move out of range, as well showing you a realtime map displaying your friends location.

Bash

Bash is a mobile application that makes organizing activities with friends seamless and hassle free. Bash lets you create an event and then immediately sends a push notification to all of the invited friends. Your friends can then opt in or opt out, without having to argue for hours on details.

PROFILE
