💼 EXPERIENCE

Flipboard
Jul 2014 – Sept 2014

Engineering Intern
Worked as a Software Developer Intern on the Platforms Team. Used several external and internal frameworks to build an internal analytics dashboard. Worked on an internal interface to increase productivity of customer-support team. An interface for dealing with customer issues and flagged items coupled with a robust analytics system with notifications and warnings.

Softech
Jun 2013 – Aug 2013

Web Dev Intern
Worked as a Software Engineering Intern on Web Development Team. Worked on Front-End for Company web presence. Used technologies include jQuery, Boots-trap, and Backbone.js to create a seamless beautiful responsive webpage.

dshaik.com
Jan 2012 – May 2013

Freelance Developer
Met with clients to define aesthetic and functional specifications. Analyzed client's business objectives and directions for the web in terms of product positioning, branding, target audience or markets and web traffic generation. Worked with a variety of businesses in order to create a web presence for their brand.

📱 PROJECTS

Reading Rainbow

A native Mac application, which allows students to stream textbooks, and novels for free instantly. Reading Rainbow streams torrent files from kickass.so in order to allow students to access course material without paying money. Reading Rainbow the equivalent of Popcorn-Time for books.

Bash

Bash is a mobile application that makes organizing activities with friends seamless and hassle free. Bash lets you create an event and then immediately sends a push notification to all of the invited friends. Your friends can then opt in or opt out, without having to argue for hours on details.

👤 PROFILE
